Q: How to make onMouseLeave in React include the child context?

I am currently building a dropdown button to learn React. I have made two onMouseEnter and **onMouseLeave** events in the parent div to make it visible when hovering it disappear when not. The problem is … that those events only stick to parent. How to make **onMouseLeave** in React include the child context? Or, how can I keep the state expand be true when hovering on children? class DropDownButton …
